

LIGHT STONE WALL PANEL

Light Stone, 采用高强度树脂材质

透光面板设计

A premium backlit wall panel designed to create a luxurious marble glow for interior spaces. Featuring elegant marble veining and a translucent finish, it delivers a seamless, high-end look inspired by hotel-style interiors. Applications at feature walls, TV backdrops, reception counters, hotel lobbies, and commercial spaces.

Translucent marble effect with LED backlighting

Durable, and low maintenance

Smooth surface for a refined finish

MATERIALS

The Light Stone Marble Panel is made from high-quality resin. Resin makes the panel lightweight yet strong, durable, and crack-resistant, while offering high translucency for soft, even backlighting. It is moisture-resistant, low-maintenance, and allows seamless joints with consistent marble patterns, making it perfect for creating elegant, glowing feature walls with a luxury hotel or modern contemporary feel.
