

PVC RATTAN WEBBING GEOMETRA™

The Surveyor of Art

PVC RATTAN WEBBING is a versatile material used in both furniture and interior design for its functional and decorative qualities. It provides excellent ventilation and breathability, making it ideal for chair backs, cabinet doors, and decorative panels. Despite being lightweight, it offers strong support and durability. Aesthetically, rattan webbing adds a natural, textured look that complements boho, vintage, tropical, or mid-century styles. It's commonly used in custom furniture like sideboards, headboards, and accent panels to bring warmth and a handcrafted feel to any space.

MATERIALS

PP (Polypropylene): Lightweight & Durable / Water & Chemical Resistant / Stiff & Heat Resistant / Eco-Friendly Option

PE (Polyethylene) : Flexible & Impact Resistant / Excellent Moisture Barrier / Low Cost & Lightweight / UV Resistant
